Skills

Programming Languages

- Python, C, C++, JavaScript, TypeScript, Node.js.

Frameworks

- React.js, Next.js, Nest.js, FastAPI, LangChain.

AI & Retrieval Systems

- RAG, Embeddings, Vector Search, LLM Evaluation, AI Agents.

Databases

- PostgreSQL; MongoDB

Styling

- CSS, Tailwind CSS, HTML, Material UI, Shadcn UI, Ant Design, Daisy UI.

Containerization & DevOps

- Docker, Ansible, Kubernetes, Portainer, GitLab CI/CD, Nginx.

Version Control

- Git, GitHub, GitLab.

Software Development

- Problem-solving, System Design, REST APIs, Scalable Web Applications.

Workflow Automation

- n8n, API Integrations, Business Process Automation, AI Workflow Orchestration.

Languages

Arabic (Native), English (Proficient), French (intermediate)

Profile

Full-Stack Developer specializing in **React**, **TypeScript**, **Next.js**, and modern **cloud infrastructure**. Experienced in building scalable web applications, **AI-powered solutions**, and production-ready systems using **Node.js**, **PostgreSQL**, **Docker**, **GitLab CI/CD**, and **Nginx**. Skilled in **AI integrations**, **workflow automation**, **cloud deployment**, and delivering high-performance user-focused applications.

Professional Experience

Full-Stack Software Engineer, *DIGITAL BRAIN* 📍

08/2025 – Present | Casablanca, Morocco

- Developed full-stack web applications using **React**, **Next.js**, **TypeScript**, **Node.js**, and **PostgreSQL**.
- Integrated **AI-powered solutions**, including **voice agents** and **business automation workflows**.
- Designed and managed **Docker-based deployments**, **CI/CD pipelines**, and **cloud infrastructure**.
- Built and maintained **SaaS products** for the restaurant and hospitality industry.
- Implemented API integrations, **real-time communication**, and scalable production systems.

Frontend Freelancer, *UM6P*

12/2024 – 07/2025 | Ben Guerir, Morocco

- Built frontend features using **React** and **TypeScript**, including secure authentication flows (sign-in, login, 2FA) and user profile management.
- Implemented efficient state handling with **React Query** and **Zustand** to improve performance and user experience.
- Developed clean, reliable UI components using **ShadCN UI**.

Software Developer, *ProCaneq / OCP*

05/2024 – 11/2024 | Ben Guerir, Morocco

- Designed and implemented UI components for an application that automated manual workflows, ensuring smooth integration with backend services.
- Collaborated within the team to enhance performance and improve overall user experience.

Projects

Inception of Things - Kubernetes Infrastructure Project

- **Developed** a lightweight Kubernetes cluster using K3s and Vagrant for virtual machine orchestration.
- **Deployed** multiple applications within the cluster utilizing Kubernetes Ingress for efficient routing.
- **Implemented** a containerized Kubernetes environment with K3d and established GitOps workflows using Argo CD for automated application deployment.

Education

Software engineer at 1337 (42 Network), *UM6P*

10/2021 | Ben Guerir, Morocco

- I completed the Common Core program at 1337 School (42 Network), reaching Level 19.12 and earning the title of **Computer Scientist**. This project-driven training sharpened my problem-solving, algorithmic thinking, and programming skills across various languages.

Specialized IT Technician : Networks and Support, *OFPP*

09/2019 – 06/2021 | Marrakech
